

# *Community Garden*

We are putting together a committee to start a community garden. All parents, grandparents and members of the community are welcome!

Our mission in starting this garden is to:

- Encourage sustainable living in our community
- Provide free and fresh produce for our students to take home
- Share knowledge of medicinal and native plants

We want to hear your ideas and garden with you!

If you are interested in being on the community garden committee please contact the school office!

- Your Deroche PAC
